Empathy map – Parents

to visit this website, they do not know the section where they are	Insights
what are the contents can attract attention. The thore is a path created inside of each target current would be better, so they can go into others page directly. Payents Visiting or need to be keep on the page. Think about what are the mostly important info parents want to look at in order to draw attention. Payents On the contents are the page. Think about what are the mostly important info parents want to look at in order to draw attention.	How to make all contents with parents well connected that make sure what are parents doing
- did not show how the	- Would be better idea to allow users report feedback of broken links
Make the winkflue getting well while visiting the whole contents. - kind of confused about where to click or go into right info - concorned that programs do not contain enough info when they look through	or info
Problem statement Stakeholder Need Insight	
NEEDS A WAY TO find the right info (describe person using empathetic language) NEEDS A WAY TO find the right info (needs are VERBS)	Design Thinking Action Lab 201:
